

SolarCoin (SLR)

The Sun generates
more energy in one
hour than the World
uses in one year

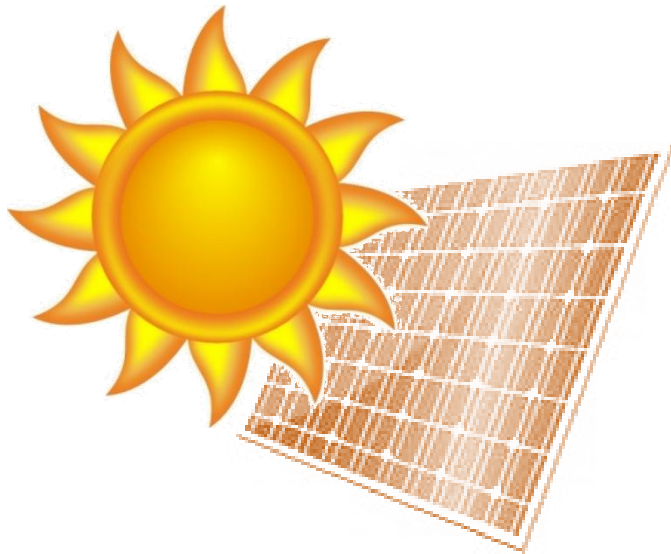

SolarCoin is digital currency

SolarCoin is a new environmentally friendly currency backed by the solar output of photovoltaic solar panels

Each MWh of power produced will reward the owner with $\$1$ SLR

Solar electricity

Digital currency

SolarCoin helps our planet

SolarCoin is given for free as an incentive to solar energy producers for using and producing renewable energies

1 MWh

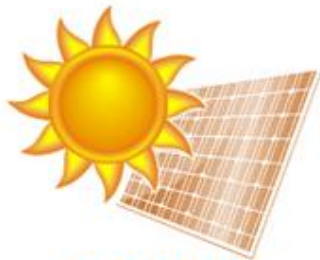

1,500 lbs.

+1.8 °C

Electricity from Fossil Fuels put Carbon into our Atmosphere

1 MWh

0 lbs.

+0.0 °C

Renewable energy release no Carbon into our Atmosphere

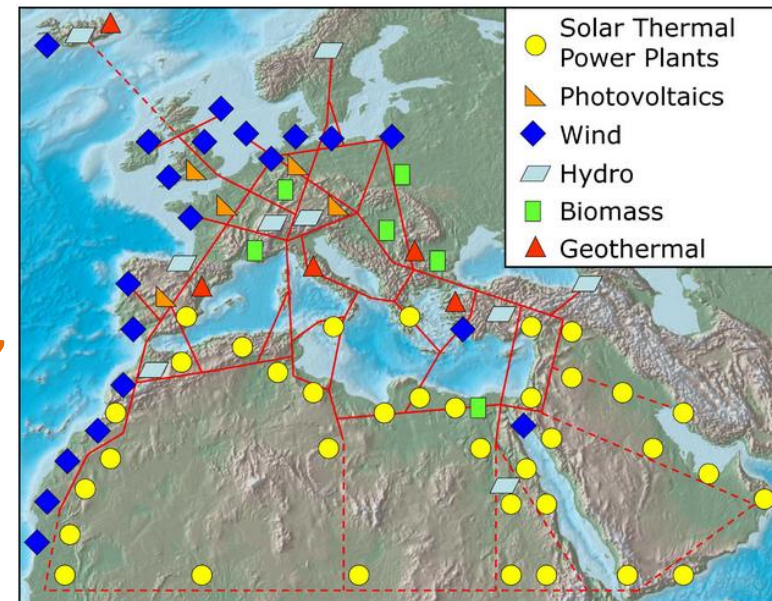

Solar Power may deliver our energy needs

➔ Solar power has achieved Grid Parity : solar panels may deliver electricity at a cost-effective price and compete with traditional fossil sources

➔ Energy Storage enables storing the energy needed for delayed consumption. Several technologies are entering industrial production (Lithium Batteries...)

➔ Deployment of a Smart Grid is a reality

➔ In implementing these technologies, millions of jobs will be created across the world

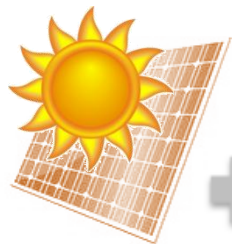

Getting SolarCoin

1. Download SolarCoin-QT wallet

2. Participate in the SolarCoin Community

Register your Solar Installation and Generate Electricity

Accept SLR for your business

Exchange USD-SLR, BTC-SLR...

SolarCoin grant process for Solar Generators

1.

SolarCoin Foundation & Community accept verification methods

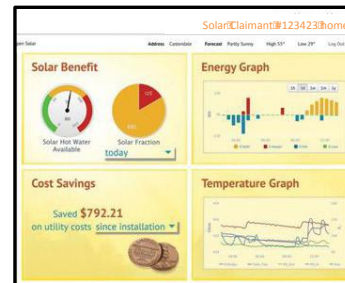

2.

Generator verified
Owner verified

3.

Meter verification submitted

4.

Grant delivered
